

### Hunt Spot 1

Located very close to the parking lot, right off the main trail, this hole boasts a very open canopy. We expect this hole to fill with water as the season progresses and the rainwater and Noxubee River overflow begin to fill it, but this may not occur until later in December or January.

### Hunt Spot 2

This spot, also located on the Noxubee River side, has several downed trees felled by the many tornados that have hit the area. The canopy is very open, and the shoreline offers lots of covers for hunters. While also not yet filled with water, as the season progresses and the Noxubee floods, this hole may prove to be great!

### Hunt Spot 3

This spot is the first on Widgeon Way to be on the already flooded side of GTR2. The slough is not yet full, but should prove to be a good hole as the rainy season kicks in.

#### Hunt Spot 4

This slough parallels the main trail and is around 20 yards wide and several feet deep.

#### Hunt Spot 5

This slough parallels the main trail and is around 20 yards wide and several feet deep.

#### Hunt Spot 6

Located very close to the parking lot on Gadwall Grove, please be aware of cars and other hunters while hunting. The water is very deep, so having a dog would be nice. A boat has been provided at this site.

### Hunt Spot 7

As an old duck banding site, this spot has a grassy bank and wide channel. The water here will flood waders, so it is best to bring a dog for retrieving ducks. A boat has been provided at this site.

### Hunt Spot 8

Located along the same channel as blinds 7 and 9, the water here is deep and gently flowing, so dogs are recommended! A boat has been provided at this site. Be aware that this site is located within sight of Gadwall Grove, so passersby should be courteous of fellow hunters and walk by quietly!

### Hunt Spot 9

While seemingly close to spot 10, hunters are positioned on sloughs that face in the opposite direction. If you don't want to feel crowded though, try choosing a different blind if 10 has already been chosen. A dog is recommended for retrieving at this deep water, however a boat has been provided at this site.

### Hunt Spot 10

While seemingly close to spot 9, hunters are positioned on sloughs that face in the opposite direction. If you don't want to feel crowded though, try choosing a different blind if 10 has already been chosen.

### Hunt Spot 11

This very open spot is located on the other side of a fairly large depression in the road, so waders are a must in this 3 to 4 foot crossing! Be aware that if hunters have chosen either blinds 12, 20, or 21 they will be walking near your blind site since you are right off the road.

### Hunt Spot 12

This hunt spot is located on the other side of a fairly large depression in the road, so waders are a must in this 3 to 4 foot crossing!

### Hunt Spot 13

This is a very expansive slough with some fairly deep channels. While a dog might not be needed, it might not be a bad idea to have one.

### Hunt Spot 14

Located near the beginning of the Ruddy Road, this slough is fairly deep and contains gently flowing water. A dog is recommended for retrieving ducks. A boat has been provided at this site.

### Hunt Spot 15

Located in the middle of three sloughs, there is a 180 degree view of water, and plenty of options for decoy placement and hunting. The water here is only a few feet deep.

### Hunt Spot 16

Part of the same slough as 17, a dog is recommended to hunt these slightly deeper waters.

### Hunt Spot 17

Very open and part of the same slough as 16, a dog is recommended to hunt these slightly deeper waters.

### Hunt Spot 18

This spot boasts lots of a wide open expanse of water and is located only a few feet from the main trail.

### Hunt Spot 19

Less wooded than our other spots, this place offers herbaceous cover for hunters and ducks as well as several grasses that ducks feed on.

### Hunt Spot 20

This slough is located in a secluded part of the GTR at the end of a peninsula, offering an almost 360 view of open flooded timber.

### Hunt Spot 21

Being the most secluded spot on Shoveler Shortcut, the 0.8 mile walk is certainly worth it after you see how open the waters are while still providing good cover from the bank.

## Hunt Spot 22

This is the very last spot on Ruddy Road and is located almost on the toe of GTR2 Levee. It offers wide open, shallow waters, perfect for dabblers.
